

Direct Systems Support (DSS) and Cognos Software Solutions

DSS is committed to helping you use the power of Business Intelligence (BI) to turn data into actionable information that gives your company a competitive edge. As an IBM Premier Partner for close to 20 years, DSS has the knowledge and the resources to enable you to maximize your return on your investment in information management technology.

Cognos Solution Offerings

COGNOS BUSINESS INTELLIGENCE: IBM Cognos 8 Business Intelligence delivers the complete range of BI capabilities: Reporting, Analysis, Dashboarding and Scorecards on a single, service-oriented architecture (SOA). Author, share and use reports that draw on data across all enterprise sources for better business decisions.

COGNOS REPORTING: IBM Cognos 8 BI Reporting enables you to make smarter business decisions by providing a comprehensive set of reporting capabilities and access to the information you need. Reporting with IBM Cognos 8 BI delivers a single, Web-based, solution for all aspects of the reporting lifecycle

ANALYSIS: IBM Cognos 8 BI Analysis enables the interactive exploration of information regardless of where the data is stored (OLAP and dimensionally modeled relational sources). It is particularly useful for managers and analysts who need to analyze and report trends in organizational performance.

DASHBOARDS: IBM Cognos 8 Business Intelligence Dashboarding solutions help you monitor, measure and manage corporate performance. Dashboards provide an at-a-glance, factual and timely view of business performance. You can identify anomalies that could turn into significant business issues, and you can dig deeper into root causes.

SCORECARDING: IBM Cognos 8 BI Scorecarding software helps you align your teams and tactics with strategy, communicate goals consistently and monitor performance against targets.
